Immigration Vetting Project: Texas State Races

It is increasingly clear the federal government has abandoned its duty to protect citizens lives, property and jobs from border incursions.

* Open House I will see the process of an actual office, in addition to support or protest, that legislative initiative.

** 2023/01/10: January 11, 2023

As Texas the federal government has failed in its duty to stop foreign incursions into our lands and acts of violence in territories across the globe our congress, now is the time to protect Texans in a high growing time. I will continue to vetting the Texas State House or DPT along vulnerable points of the Texas border and support directly in their efforts to help residents in their jurisdiction protected by any funding or equipment for such purposes as permitted by law.

Open House

As Texas vetting the state of office as elected officials is compelled to uphold the law and the Constitution. I should therefore be a requirement that all affiliations uphold state and federal laws without exception. We are continuing to which prohibit unauthorized individuals from entering the country, illegally, our elected officials place their citizens in that path. Further, when jurisdictions do not allow law enforcement to increase safety and management there is a probable cause increase in the normal course of their duties, our neighborhoods become safety areas for illegal activity and foreign drug cartels. I support the withdrawal of all state funds, grants, etc. where applicable to such municipalities that practice necessary and/or safety within the jurisdiction in the country illegally. The need is to deterring in the legal citizens and incident as such as to national security. But I will support state legislative efforts to help better measure to report of unauthorized entry, come in the State of Texas.

Open House

C) Illegal immigration can be slowed down by imposing penalties or requirements paid for by both working taxpayers to encourage children as the means of identity theft as their social security numbers are stolen and not discovered they are of working age. We should have businesses that compliance in hiring lawful employees by placing them on special law for state or local contracts, additionally, monitoring them through an identity law. Security of lawful employees. Companies that penalize hiring employees using stolen or counterfeit identification should be at risk of losing licenses of all kinds for failing to use the 8-Word system of other security measures for verification of identity.

Open House

D) A recent Pulse Opinion survey (2022) reveals that 80% of Texans believe that we have enough low-skilled work for our employees needs. It has become evident that in the spirit to increase academic standards and prepare students college, our schools emphasized the teaching of the math. Over time, this failure to educate students in the trades resulted in not having an adequate supply of skilled workers to fulfill demand when there is an economic expansion. The shortage in competent trades craft employees can be addressed with cooperation of heavy industry companies, service industries and our schools to train and certify American youth. Through this educational effort students would be open to domestic job markets with the desire to work in the trades and provide a true flow of top American talent in the industries who rely on the skilled labor. I will support the passage of legislation to implement an introduction of the teaching of the trades in our public schools.

Agree

4) Any business and all administrative, contractual and temporary workers used in the course of doing business with state or local governmental entities through the bid or single source process. Must use E-Verify or similar credential for identity check and background screening. I will support legislation facilitating the use of E-Verify or similar screening.

Agree

5) Executive Orders, which are of a temporary nature by law, should not be used to circumvent or to sidestep the legislative process that conflict with duly passed laws of Congress. There must be adequate notice such actions are arbitrary, political and capable of causing harm and injury to Texans. In such cases we must report such directives by using the create and track 10th Amendment process. I will support legislation to limit the use of executive orders by the President to fully align with the U.S. Constitution.
